Above/Underground Storage Tank - Removal or Install

To take action on storage tanks require submittals:

Site plan with property/building lines
Type, style, and number of tanks, dispensers, pipe
All testing certificates
Specification of compaction and cover for pipe
Letter identifying electrical contractor
Copy of TCEQ tank install license
Secondary containment means with calculations
TCEQ receipt of UST construction notification
(where applicable)

Most plan reviews will take up to (10) working days. Incomplete submittals will increase this review time. It is important that specification information accompany the submittals to our office. The information listed above is not intended to be an inclusive list of required items but a reference point to start the process. In most cases, this information will be all that is required (newly developed processes and systems may require additional information or manufacturers information).
